#### Accessibility + Adequate Speeds + Affordability + Awareness = ADOPTION

Bad

Limited high capacity fiber

Kentucky is 46<sup>th</sup> in the nation for broadband availability

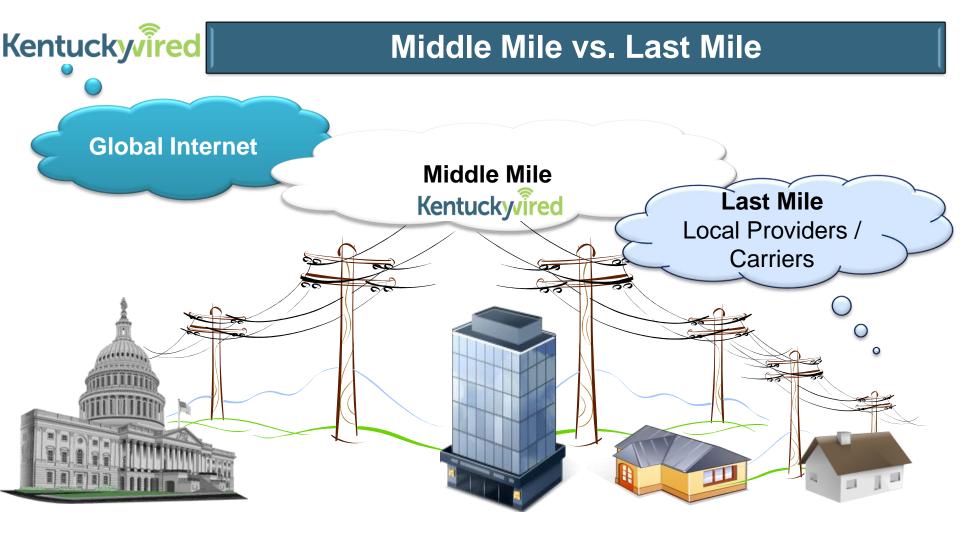

23% of Rural population has no access vs. 1.5% in Urban areas

Only 30% of Eastern Kentucky households adopt broadband vs. 60% urban adopters at the Federal Communication Commission's previous standard speed of 3 Mbps

Gap widens with the FCC's new standard speed at 25 Mbps

Worst

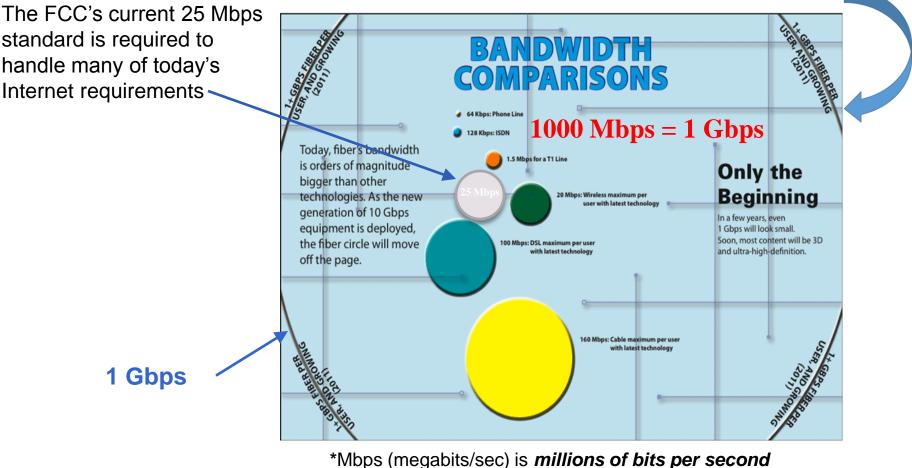

<u>Middle mile</u> often refers to the network connection between the worldwide Internet and the <u>last mile</u>. For instance, in a rural area, the middle mile would connect the town's network to a larger city.

<u>Fiber-To-The-Premises (FTTP)</u> - Internet Service Provider (ISP) installs fiber optic cable directly to a home or business.

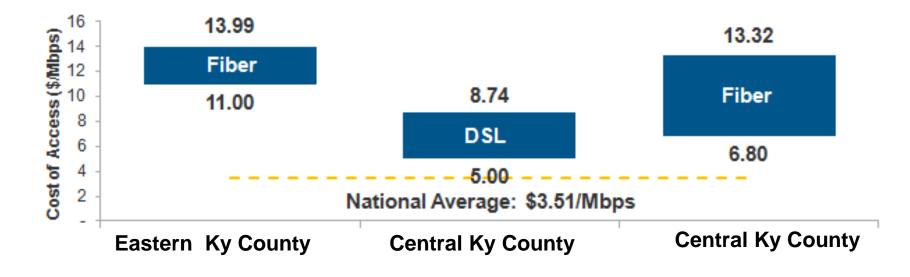

## Mbps vs. Gbps

# Most U.S. metro areas have access to Fiber and High Speed Broadband

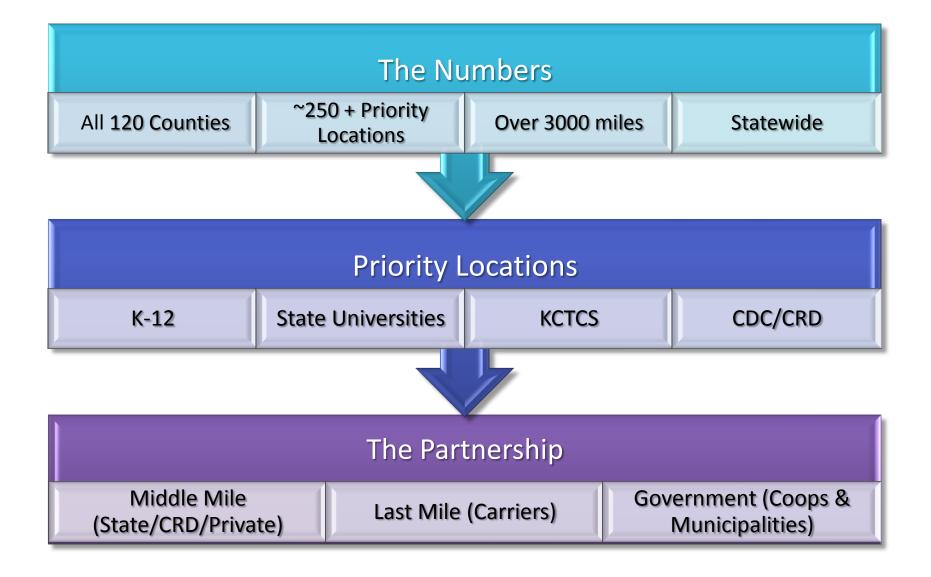

Gbps (gigabits/sec) is *billions of bits per second*
